EDUCATION

Sagar Institution of Science Technology & Research, Ratibad Campus, Bhopal – Nov 2021 – Jun 2025

Bachelors of Technology in Computer Science Engineering - Internet of *Things* - ***CGPA: 7.44*** *Bhopal, India*

COURSEWORK

- Data Structures & Algorithms
- Operating Systems
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOPS)

EXPERIENCE

Junior Software Engineer **– Ahoy Systems Private Limited (Gurugram)** Jun 2026 – Present

- Contributing to the development and maintenance of core features for live projects using clean and efficient code.
- Collaborating with the engineering team to analyze project requirements, resolve issues, and ensure smooth software delivery.

Frontend Developer Full-Time **– YoursCollege (Remote)** Sep 2025 –Feb 2026

- UI/UX & Performance: Developed responsive web interfaces and optimized performance using React.js and Lazy Loading.
- Cross-Browser Compatibility: Ensured seamless functionality across all major browsers and devices following best coding practices.
- Collaboration: Worked closely with design and backend teams to implement functional web applications from UI/UX designs.

Frontend Developer Intern **– PlexiGenius Solutions Pvt Ltd (Remote)** Nov 2024 – May 2025

- Optimized website performance by improving load times and reducing errors.
- Developed responsive web pages using HTML, CSS, and JavaScript to ensure seamless compatibility across mobile, tablet, and desktop devices.
- Worked on modern UI components using React.js, enhancing code and improving user interface responsiveness.

PROJECTS

Zomato Clone – Full-Stack Web Application | Technologies: React.js, Tailwind CSS, Laravel (PHP), MySQL

- Developed a high-performance food delivery web app inspired by Zomato, featuring seamless restaurant discovery, category-based filtering, and dynamic search functionality.
- Implemented core features such as real-time cart management, multi-step checkout flow, and dynamic menu routing using React Router.
- **Live Link**: https://zomato-clone-web-2025.netlify.app/

MyLoginApp | Technologies: React Native, Expo, React Navigation

- User Authentication: Built a secure login and registration system allowing users to sign up and manage their profiles safely.
- Responsive UI: Designed mobile-first interface using React Native for Android and IOS compatibility.
- **Link**: https://smartserve-app.netlify.app/

Heart Defect Monitoring System | Technologies: Micro Python

- Designed a system to continuously monitor and analyze heart function to detect defects and abnormalities.
- Enabled real-time tracking of vital signs including heart rate, blood pressure, oxygen saturation, and ECG data.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS, JavaScript, PHP, SQL
- **Development Tools:** VS Code, Git, GitHub.
- **Backend Frameworks:** Laravel (PHP), Firebase.
- **Database Management:** MYSQL.
- **Technologies/Frameworks:** React.js, Next js,Redux Toolkit, Tailwind CSS, Firebase.

Co-Curricular Activities

- Participated in Utopia 2024 Web Craft Competition.
- Participant,SISTec Innvovation Hackathon.

CERTIFICATIONS

- Attended 2 days workshop on Embedded System & IoT from Robonauts India, Bhopal.
- Attended 2 days workshop on Data Structure & Algorithms at MANIT Bhopal.
