EDUCATION

Sagar Institution of Science Technology & Research, Ratibad Campus, Bhopal – MP Nov 2021 – June 2025
Bachelors of Technology in Computer Science Engineering - Internet of *Things* - ***CGPA: 7.94*** *Bhopal, India*

COURSEWORK

- Data Structures & Algorithms
- Operating Systems
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOPS)

EXPERIENCE

Front-end Developer Intern Nov 2024 – May 2025
PlexiGenius Soltuions Pvt Ltd

- Optimized website performance by improving load times and reducing errors.
- Developed responsive web pages using HTML, CSS, and JavaScript to ensure seamless compatibility across mobile, tablet, and desktop devices.
- Contributed to code reviews and adhered to best practices for clean and maintainable code.
- Worked on modern UI components using React.js, enhancing code modularity and improving user interface responsiveness.

PROJECTS

Zomato Web| Technologies: React.js, Firebase

- Built a responsive food delivery web application inspired by Zomato, enabling users to browse restaurants, filter cuisines, and manage cart orders in real-time.
- Integrated Firebase for authentication and real-time database to manage user sessions, order data, and restaurant menus.
- Designed a fully responsive UI using React.js with conditional rendering and media queries to ensure smooth user experience across mobile, tablet, and desktop screens.
- Implemented dynamic restaurant listings and search filters with state management using React Hooks to improve UI responsiveness and performance.
- Optimized page load speed and image rendering using lazy loading techniques, resulting in a smoother browsing experience on slower connections.
- **Live Link**: https://react-zomato.netlify.app/

E-Learning Platform | Technologies: HTML, CSS, Javascript

- Developed an online environment designed to deliver educational content and support learning for students, teachers, and administrators.
- Implemented features such as course content delivery, progress tracking, interactive quizzes, and user dashboards.
- Enabled role-based access and content visibility for different types of users.
- Focused on responsive and user-friendly UI/UX design for accessibility across all devices.
- Ensured smooth interaction and collaboration through structured layout and clean navigation.
- **Link**: https://e-learnig-platform.netlify.app/

Heart Defect Monitoring System | Technologies: Micro Python

- Designed a system to continuously monitor and analyze heart function to detect defects and abnormalities.
- Enabled real-time tracking of vital signs including heart rate, blood pressure, oxygen saturation, and ECG data.
- Integrated with medical devices to collect and store health metrics securely.
- Triggered instant alerts to healthcare professionals in case of irregularities, enabling early diagnosis and timely intervention.
- Aimed to improve patient outcomes through proactive cardiac health management using continuous data streams.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS, JavaScript, SQL
- **Development Tools:** VS Code, Git, Github.
- **Technologies/Frameworks:** React.js, GitHub, MS Excel

Co-Curricular Activities

- Participated in Utopia 2024 Web Craft Competition.
- Participant,SISTec Innvovation Hackathon.

CERTIFICATIONS

- Attended 2 days workshop on Embedded System & IoT from Robonau ts India, Bhopal.
- Attended 2 days workshop on Data Structure & Algorithms at MANIT Bhopal.
- Completed an online certified course on Cloud Computing from NPTEL.
